

Cross-Platform Content Strategy Analysis: Netflix vs Prime vs Disney+ vs Hulu

➤ Objective:

Analyze and compare content trends across the four streaming platforms to uncover:

- Who has the most diverse content?
- How release trends vary?
- What genres dominate each platform?
- Which platforms are more global in reach?
- Who targets long-form vs short-form content?

➤ Datasets Overview:

Each dataset contains similar structure:

- show_id
- type (Movie/TV Show)
- title
- director
- cast
- country
- date_added
- release_year
- rating
- duration
- listed_in
- description

➤ Add This Column to All:

- platform: Set values as Netflix, Amazon Prime, Disney Plus, Hulu (for platform identification after merging)

Proposed Combined Table Name: streaming_titles

✓ Project Scope

➤ Data Engineering (SQL):

- Merge all datasets with a platform column.
- Clean missing data (especially date_added, director, country).
- Split duration into numeric + unit.
- Normalize listed_in, cast, and country into separate lookup/junction tables (if possible).

✓ Analysis Questions (SQL Tasks)

➤ Platform Content Comparison

- Total titles per platform
- Movie vs TV show breakdown per platform
- Yearly trend of content addition (based on date_added)
- Rating comparison across platforms (TV-MA, PG, etc.)

➤ Global Reach

- Top producing countries per platform
- Which platforms have the most internationally sourced content?

➤ Genre & Duration Deep Dive

- Top genres per platform
- Most diverse genres on a platform
- Duration trends (short vs long movies/episodes)
- TV shows with most seasons (can infer from long durations)

➤ Director & Cast Influence

- Top directors with most content across platforms
- Recurring cast members across platforms (like actors who appear on Netflix and Hulu)

➤ Advanced Use Cases

- Use **Window Functions** to rank countries, directors, and genres.
- Use **CTEs** for normalization and cleaning.
- Use **Common Queries** to build genre trends across years and platforms.

➤ Final Deliverables

Components	Description
SQL Script	For table creation, cleaning, analysis
Visual Report (Optional)	Tableau/Power BI dashboards for insights
Documentation	Business questions, SQL logic, summary of findings
Summary Report	Suggestions for each platform's strategy
